

Informal Review Checklist - STLDD

Created: 2021-02-15

Check the following:

- Document number.
- Date.
- Title.
- Version.
- Sections and subsections.
- Compare document history with Status Report in E-PUSS.
- Correct grammar.
- No typos.
- Consistency between figures/tables/overall text.

STLDD specific

- The document contains a detailed design that describes the components of the system.
- Every class and every public method is described.
- The document contains a class diagram.
- Two sequence diagrams exist for every important piece of functionality of the system.
- All sequence diagrams have the same style and look consistent.
- The structure of the database is described in detail, by either an ER-diagram that displays all the fields, or by having the SQL-code that can generate all the tables in the database.
